

NKECHI JUDITH ECHETA

Winnipeg, MB | 437-808-9232 | nkechiecheta06@gmail.com

Professional Summary

Software Development student in the Application Development and Delivery diploma program with hands-on experience building and supporting applications using JavaScript/TypeScript, Python, SQL, MongoDB, and cloud technologies. Experienced in full-stack and backend development, API testing, and working with both SQL and NoSQL databases. Comfortable working in Agile teams, contributing to development tasks, troubleshooting issues, and communicating clearly with both technical and non-technical team members. A motivated learner with a strong interest in building reliable, user-focused software and growing as a developer through real-world experience.

- Chatbot Development Project: Developed a chatbot using Python to integrate a web-based interface to improve accessibility.
- Cloud-Based Inventory Application (AWS): Built a serverless inventory system using AWS Lambda, DynamoDB, and API Gateway, with API testing in Postman and basic CI/CD via GitHub Actions.
- Full-Stack Development: Built interactive and responsive web applications using React, HTML, CSS, and JavaScript, ensuring cross-device compatibility and user engagement.

Education

Diploma: Application Development and Delivery

Red River College Polytechnic – Winnipeg, MB

09/2024 – Present

- Completed coursework in object-oriented programming, web development, and database design.
- Built full-stack and backend-focused applications as part of individual and team projects.
- Enhanced knowledge of Agile methodologies and system optimization.
- Practiced debugging, testing, and improving application functionality.

Bachelor of Arts: Education

University of Jos - Jos, Nigeria

09/2013 to 06/2018

IT Projects

Red River College Polytechnic

09/2024 – Present

Chatbot Development Project

Built a Python-based chatbot with a simple web interface to improve user accessibility. Implemented logic to automate responses and support common user requests. Worked collaboratively with peers and incorporated feedback throughout development.

Database & API Development Projects

Designed and queried SQL and MongoDB databases. Implemented CRUD operations and tested RESTful endpoints. Documented functionality and basic troubleshooting steps for future reference.

Full-Stack Web Application Project

Developed a responsive web application using React, JavaScript, HTML, and CSS.
Integrated backend services and database storage.
Participated in sprint planning and regular team check-ins.
Focused on clean code, usability, and maintainability.

Cloud-Based Inventory Application (AWS)

Built a serverless inventory application using AWS Lambda, API Gateway, and DynamoDB.
Designed the DynamoDB data model using NoSQL Workbench.
Tested RESTful endpoints with Postman and supported basic CI/CD using GitHub Actions.

Professional Experience

Customer Service Officer

Chevajo Nig Limited – Abuja, Nigeria

08/2022 to 04/2024

- Resolved customer issues efficiently by listening carefully and identifying practical solutions.
- Communicated clearly with customers and team members, both in person and through written systems.
- Documented cases accurately using CRM tools to support follow-up and reporting

Creative Director

Acetop Events – Jos, Nigeria

08/2019 to 01/2023

- Planned and coordinated projects from start to finish, working closely with clients and team members
- Balanced timelines, resources, and client expectations to deliver successful outcomes
- Strengthened leadership, organization, and communication skills through hands-on project management.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL.

Frontend: React.js, HTML, CSS, Material UI, Semantic UI.

Backend & APIs: Node.js, RESTful APIs, basic microservice concepts.

Databases: MySQL, MongoDB, PostgreSQL, Amazon DynamoDB (NoSQL Workbench), Firebase.

Cloud & Tools: AWS (Cloud Foundations – AWS Academy), AWS Lambda, Amazon S3, Amazon DynamoDB, API Gateway, Git, GitHub, GitHub Actions (CI/CD), Postman, Visual Studio Code, Docker.

Development Practices: Agile (Scrum & Kanban), Jira, Bitbucket, Confluence, basic testing concepts

Professional Skills

- Works well in team-based and Agile environments.
- Communicates clearly in both written and verbal settings.
- Approaches problems methodically and thoughtfully.
- Manages time and tasks effectively in fast-paced settings.
- Comfortable learning new tools and technologies.
- Maintains a customer- and user-focused mindset.
- Able to work independently while knowing when to ask questions.
